## SYCOM EXPANDS ROANOKE OFFICE

Richmond, VA – July 1, 2014 – SyCom Technologies is pleased to announce that it has expanded operations in SWVA and moved their Roanoke-based offices to a new location in the County of Roanoke, Virginia. This will allow the company to showcase state of the art collaboration technologies and communicate via real-time video with the four other SyCom offices throughout Virginia and West Virginia.

“We are thrilled to offer access to the newest collaboration technologies to our customers, partners and prospects,” says Tom Spitnale, General Manager for the Western Region (including Roanoke and WV). “The Colonnade facility offers a professional atmosphere with ample parking and great access to the community within Roanoke County.”

Experiencing significant growth from 2009-2014, SyCom made the move to their new address at 2800 Electric Road, Suite 103C, Roanoke VA 24018 in early 2015. Plans for the upgrade featured a branded interior, TelePresence communication technology from Cisco Systems (a close vendor partner), and even a ping pong table!

A video featuring the Roanoke team, office, and technology illustrates the fresh environment and its capabilities can be seen at the following link:  
<https://youtu.be/rXgQ47c84GQ>.

The company anticipates reaching their goal of \$80 million in revenue this year as they continue to abide by their mission to provide outstanding and memorable service in everything they do.

### About SyCom Technologies

Founded in 1996, SyCom is an award-winning IT Systems Integrator headquartered in Richmond, Virginia. With offices throughout Virginia and West Virginia, their focus is on mid-Atlantic companies, healthcare organizations,
